### Abstract:

China General Nuclear Power Corporation (CGN) is a leading nuclear power enterprise in China. It developed, in conjunction with CLP, the Daya Bay Nuclear Power Station and has flourished along with the expanding nuclear power programme of China. It engages in nuclear power generation as well as nuclear fuel supply and nuclear power plant design and development. The speaker will provide an overview of development at CGN, and an outlook of its future direction. Obviously, safety is always the company's top priority. No development should jeopardize any safety issues. The company has adopted the state-of-the-art technologies and best practices to improve the overall safety of its plants.

The seminar will be conducted in Putonghua with power point in Simplified Chinese.

**Attendance/CPD Certificate will be provided**
